

## Sports with Walter Moore

Walter Moore

### Allegretti Throws One Hitter

Michael Allegretti threw a

one hitter to lead Savannah State past Delaware State 3-0 in the second game of a double header on March 14 in Dover, Delaware. In the first game, Robert Ramsdale hurled a four hitter as the Tigers won 2-1. DSU avoided the sweep on March 15 as they defeated the Tigers 15-9 despite home runs from Dexter Kelley, Andrew Mendez, Matt Nowacki and Dychal Bowles. Charleston Southern rallied from a 5-0 deficit to beat SSU 7-5 on March 10 at Tiger Field.

Baseball newcomer USC Beaufort downed SSU (7-10) for the second time this season at Tiger Field 12-9 on March 11.

**SSU Rallies Past St. Mary**  
Savannah State scored three runs in the fifth and another in the sixth in a come from behind 5-2 victory over St. Mary (Kansas) at the Paulson Complex on March 12. SSU traveled to Jacksonville, FL on March 13 and split a double header with Edward Waters, winning 9-0 and losing 3-2. Warner Southern swept SSU 11-0 and 6-1 on March 14 in Lake Wales, FL and on March 15, Savannah State lost a twinbill to Webber International 12-0 and 9-0.

### SSU Men Sixth At Bulldog Relays

The Savannah State men's track team placed sixth in the 38th Annual Bulldog Relays hosted by South Carolina State on March 14 in Orangeburg, S.C. while the SSU women finished ninth. No SSU participant won any events but Amber Hughes (triple jump), Marcus Stallworth (110m hurdles) and the men's 4x110 shuttle hurdle relay team all had second place finishes. SSU had 12 top ten finishes.

### Tigers Hitting the Weights

The Savannah State football program is busy in the off-season hitting the weight room. The university recently opened a new weight room in Willcox Gym. According to head coach Robby Wells, the team works out at 5 a.m. on Tuesday and Thursday and at 6 a.m. on Monday and Wednesday. Wells said the players are done by 8 a.m. so they can go eat breakfast. He added that the team has study hall Mon.-Thurs. from 6-8 and that last semester 13 Tigers had at least a 3.0 grade point average and James Brisco made a 4.0.

## Grant...continued from page 3

research process that will serve them well in their scientific careers", said Shields.

Three other faculty members in the Department of Chemistry and Physics and the Department of Biology received a second NSF-RUI grant for \$195,421. Assistant professors Brent Feske and Cliff Padgett in chemistry and physics and Scott Mateer in biology are conducting research in the area of biocatalysis and the synthesis of asymmetric molecules, which are notably used in pharmaceuticals.

The grant will allow Feske, principal investigator of the grant, Padgett and Mateer, co-principal investigators, to employ five stu-

dents to conduct summer research projects over the course of the three-year grant.

"One of the broader impacts of the grant is that we will be able to offer students summer jobs conducting research", said Feske.

The research that Feske and his team are conducting involves the development of purer compounds through techniques such as DNA cloning and the manipulation of non-pathogenic E. coli bacteria.

The fermentation process to achieve this is a relatively new field of green chemistry, which aims to transform the process of pharmaceutical manufacturing to be clean, safe and similar to large-scale beer pro-

duction.

In addition, Feske's grant will enable collaborative research among different academic areas at AASU, including biology, chemistry and physics, and potentially computer science and information technology.

Faculty and students involved in the project will come together to discuss research progress every two weeks.

"When students in one area like chemistry and physics get an opportunity to learn what students in another discipline, like biology, are working on, they get a much more diverse background and better understanding of the research", said Feske.

## Lane, Sharpe Placed in Georgia Hall Of Fame

Top: Terry Lane (l), grandson of Savannah native Mills B. Lane attends induction on behalf of his grandfather. Bottom: Shannon Sharpe (r), accepts award as he is inducted into Ga Hall of Fame. Both are pictured with State Senator Lester Jackson

## Souls...continued from page 5

taking effect, I see how eagerly they cry out His name to save them and how the tears flow. I see how some of them are set free of demon spirits, and so many wonderful moves of God's spirit for them. When my partner Barbara Brown and I get there, we always ask for the worst units. The officers always say "we are so glad you are here! We need you all over there!" Barbara and I know that without Jesus, we can't do anything, but unto him who is able to do exceedingly, abundantly above all that we ask or think according to the power that worketh in us (Ephesians 3:20).

I am confident in knowing that God is not a man that He should lie, nei-

ther the son of man that He should repent... (Numbers 23:19). His word is spirit and it is life, and he proves that to us as we believe and live it.

God said to me one day, "Let my word have evidence in your life" and I wondered how and what he meant for it to be. He began to show me by performing miracles in my life and giving tangible evidence of them all.

Each day as I live, He proves to me that His word is true because of life.

You see, I died on the operating table November 23, 1990 at Memorial Hospital while four heart specialists were performing an angioplasty to clear out my main artery.

While operating, a

blood clot formed in my heart and then ruptured blocking everything. The doctors said we cant explain it, we can't understand!". They wrote it up in in the medical journal, and included pictures.

That was one of several things that our Gracious God has done for me through the power of His word because he gave me John 11:25-26, "I am the resurrection and the life, he who believeth in my though he may die, yet shall he live. And whoever lives and believes in Me shall never die".

Do you believe this? Glory be to God! I did and still do. All Glory to God, the Father, the Son and the Holy Ghost, Amen.!

## Freedom...continued from page 7

The Women's Army Auxiliary Corps (WACs) 6888th Central Postal Directory Battalion was a World War II unit. Composed of approximately 850 African American women, the unit was formed in the days when the U.S. Armed Services was segregated. They were the only black women to serve with the U.S. military overseas during World War II.

The group was charged with handling military mail, and was based at a boarding school in Birmingham, England.

"For the morale of Soldiers in war time, only one thing counts more than somewhere to sleep

or something to eat," said Freedom Team Salute's Colonel Griffith. "That one thing is mail from home - holiday greetings, photographs, regular letters, and packages filled with items from relatives and friends. The Battalion broke all records for redistribution of mail to front line troops in the European theatre."

Freedom Team Salute was established in 2005 by the Army Chief of Staff and the Secretary of the Army, which gives the public the opportunity to thank all U.S. Army Veterans for their service by recognizing them with Commendations.

The program also honors and recognizes the

Parents, Spouses, Employers, and Supporters of Active Duty, Army Reserve, and National Guard Soldiers.

The Commendations consist of a personalized letter and certificate signed by Pete Geren, the Secretary of the Army and General George W. Casey Jr., the Army Chief of Staff. Honorees also receive lapel pins and The Salute, a quarterly newsletter that contains information of interest to the Army family.

Freedom Team Salute has honored over 1.9 million Army Veterans, Spouses, Parents, Supporters, and Employers since its launch.

## Fellwood...continued from page 8

site are learning about environmentally friendly building. He guesses that of 380 people "badged," or verified for employment at

Sustainable Fellwood, perhaps 350 never previously worked in green building.

Each of the buildings will be LEED-certified. The prestigious Leadership in Energy and Environmental Design certification (LEED) is the internationally-recognized standard for high performance, low water and ener-

gy use buildings awarded by the U.S. Green Building Council.

Through February, 82 percent of the waste from the project was recycled, Smith said, including wood, concrete, brick, metal and plastic.

That's about 460 tons that will be recycled instead of going into the landfill.

There are 11 buildings in Phase I, and all are erected and under roof. All 787 windows have been installed. Buildings 1, 3 and 5 will be completed in April, and all 11

will be completed by the end of August.

The community center, which will include the management office, a commercial washer-dryer laundry area and a recreational area, will begin to open in May and the community garden will be open in August.

Curbs are already in place in many areas. "There are opportunities for everyone in urban green living," Brockman said.

"At Sustainable Fellwood, you can be a part of the green revolution.
